

Drive innovation across the field of nursing from the perspective that matters most—yours.

Perspective. Outcomes. Voice. Are you ready to lend your POV?

Osso POV brings together influential nursing voices from the front lines of care into a focused user group that works alongside the Osso team to shape the future of immersive training.

As part of an Osso POV Innovation Rotation, you step out of the clinic and into the headset. You'll collaborate shoulder-to-shoulder with our team to validate prototypes and challenge assumptions about the future of training technology.

Bring your experience to help us drive the creation of immersive tools that are rigorous, relevant, and truly designed to support the work you do.

The POV that makes training technology work

We believe that connecting innovation to the bedside starts with perspective, outcomes, and voice—the things only nurses can bring, and what we use to build training tools that earn their place on the floor.

Perspective

You bring a lens no one else can. In VR, point of view determines what a user sees. Your point of view ensures the tools we build are not just technologically advanced but clinically vital.

Outcomes

Training is not just about content. It is about competence. Your insight ensures every nursing module we develop is rigorous enough to translate into safer, smarter care when the headset comes off.

Voice

You help set the standard. Your voice helps guide the decisions from artistic detail to clinical nuance that shape the tools your peers will rely on.

How it works

Osso POV Innovation Rotations won't be out finding bugs (we have an amazing QA team for that, and they might even drop in to say hi). We are looking to you for something different: the clinical perspective that turns good ideas into meaningful tools.

As a member of one of Osso POV's Innovation Rotations, you'll share your voice directly with our technical and creative teams, aligning innovation with clinical reality to influence the usability and design of Osso Nurse Training.

Who Should Apply

- 0–15 years of experience
- Actively working in hospitals
- U.S.-based
- We welcome a range of roles, specialties, and system sizes.

The Commitment

- Quarterly commitment
- 9–12 hours total
- ~3 touchpoints/month (VR/Zoom)
- NDA required

The Structure

- Receive a Meta Quest 3S, preloaded and shipped to you (yours to keep at the end)
- Review scenarios, test features, and provide prototype feedback
- At the conclusion of your rotation, you'll receive a digital endorsement from Osso.

The benefits of bringing your perspective

Osso VR is the leading immersive training platform for healthcare professionals, built on clinical evidence and driven by a mission to improve patient care. By joining, you play an active role in that mission.

See How it Works

See and influence how immersive nursing tools are designed, tested, and refined. You'll get a firsthand look at how virtual reality technology is reshaping the way nurses train, grow, and lead across every stage of their careers.

A Community of Innovators

Join a national network of like-minded nurses who are shaping the future of immersive training. You'll connect with peers who share your commitment to innovation, clinical excellence and safer, more confident care.

A Seat at the Table

This is a rotating, honorary group of frontline nursing professionals. Through a focused series of Zoom and VR engagements, you'll collaborate with a passionate team at Osso that believes deeply in the human side of healthcare—and builds with that in mind.

Recognized Leadership

When your rotation wraps, Osso will formally acknowledge your contribution to clinical innovation. You'll receive a digital endorsement from us validating your impact.* Add it to your LinkedIn profile, include it in your CV, or simply share it with the world as a reminder that nurses are driving the future of healthcare.

Equipped + A Token of Gratitude

We'll set you up with a VR headset to use throughout the rotation so you can give feedback directly in the environment your peers will use. When your rotation wraps, the headset is yours to keep with our thanks.

**Your voice + our team and technology =
the future of nurse training**
